

2. Reviewing an Article

1. As an unregistered user, I would like to review an article
 1. *Require users to complete story 1.1, then continue to story 2.2*
2. As a registered user, I would like to review an article
 1. *The article link is read from the user and some information is not found in the parse*
 1. I enter the required information as asked by the website to complete the data on the journal
 1. *Continue to story 2.2.2.1*
 2. *The article link is read from the user and either all data is parsed, or the article already exists in the database*
 1. I enter my review of the article, rating it on a list of requirements and optionally providing a paragraph form review of the publication
